

# Getting Started

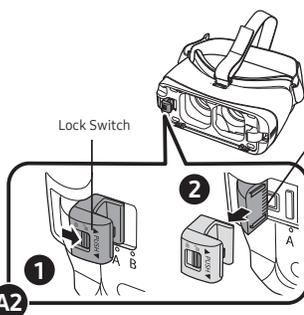

**!** **ATTENTION:** Before you get started Gear VR has adapters for using both USB-C and Micro USB phones. Verify which connector your phone uses. The USB-C adapter comes pre-installed on your Gear VR. If your phone is USB-C compatible, proceed to the Gear VR Setup Prompt section of this guide. If your phone is Micro USB compatible, follow steps A1 - A3.

Device holder lock switch

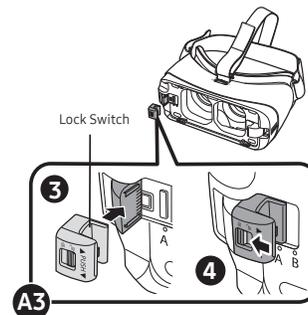

**A1** Stop and verify which USB port your phone corresponds to. For USB type-C move to the main setup for micro USB, complete A2-A3 before setup.

**A2** Locate the connection/adapters opposite of the faceplate lock. On the top of it is a small slide lock, (1) slide the lock right until you hear a click, (2) now pull up and out and to remove adapter from the connector base.

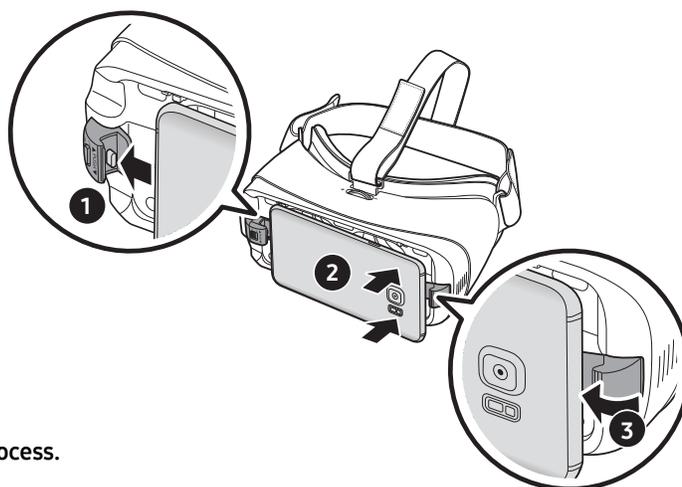

**A3** (1) Slide the Micro USB adapter into the connector base until firmly seated (2) slide left on adapter lock until you here a click. your Micro USB adapter is now in place. Proceed to Gear VR Setup Prompt.

**!** **ATTENTION:** software update is required for some users with a Galaxy S6 edge+ or Note5 device. If you plug in your device to Gear VR and nothing happens, you need to update your device's software. To download the update, you'll need a SIM-activated device with Wi-Fi enabled. Go to Settings->About Device->Software Update to check for updates.

## Gear VR Setup Prompt

- 1 To start the Setup, adjust the device holder by applying slight pressure and moving it to the left or right, according to the size of the phone.
- 2 Turn on and unlock your phone. Place the phone into the device holder so that the Micro USB port is fully connected with the Gear VR and the screen appears black.
- 3 Push the opposite side of your phone into the Gear VR cradle until you hear the snap from the device lock on the right and greets you.
